## Profile

---

Junior developer with a background in logistics and international trade, transitioning into software development after 10+ years of professional experience.

Graduated in Multiplatform App Development (Java/Kotlin) and Back-End Development (Node.js, JavaScript) at Noroff University.

Currently focused on frontend web development with React, building clean, user-friendly interfaces and integrating them with APIs.

Brings strong teamwork, adaptability and problem-solving skills developed in demanding, real-world environments.

## Technical Skills

---

- Frontend: React, JavaScript (ES6+), HTML, CSS, Tailwind, Astro
- Backend: Node.js, Express, PHP (basic), REST APIs, Java
- Databases: MySQL, MongoDB
- Tools: Git, GitHub, Postman, VS Code
- Deployment: Vercel, Netlify, Render

## Education

---

### BACK-END DEVELOPMENT

#### *Noroff School of Technology, Norway – Jun 2025*

→ Focused on server-side development, APIs, and scalable systems using JavaScript/Node.js.

### HIGHER TECHNICIAN IN MULTIPLATFORM APP DEVELOPMENT (DAM)

#### *IOC (Spain), Aug 2021 – Jun 2024*

→ Strong focus on Java/Kotlin, Android development, database integration, and software design.

### HIGHER TECHNICIAN IN INTERNATIONAL TRADE

#### *IOC (Spain), Aug 2018 – Feb 2022*

→ Training in global logistics, customs, and trade operations.

### FULL STACK WEB DEVELOPMENT (IN PROGRESS)

#### *Fullstack Open – University of Helsinki (2024)*

→ A course covering modern web dev with React, Node.js, Express, MongoDB, and RESTful APIs.

→ Emphasis on testing, CI/CD, GitHub workflows, and application deployment.

## Certifications & Courses

---

- Cisco CCNA 1-3 – Introduction to Networks, Switching & Routing, Enterprise Networking
- DG IATA Certificate – Handling of Dangerous Goods by Air (Jun 2023)
- Forklift Certificate – Occupational risk prevention (Apr 2022)

# Projects

---

- **E-COMMERCE WEB APPLICATION**

Full-featured e-commerce web application.

Includes user authentication, product catalog, shopping cart, and order management.

- User authentication, product catalog, cart and order management
- Server-rendered app built with Node.js, Express and EJS
- MySQL database with Sequelize ORM and JWT-based authentication
- Tested and documented API, deployed to production

\*GitHub repository (*shared upon request*)

- **PERSONAL FINANCE TRACKER**

Full-stack finance tracking app built with Python (FastAPI) and React.

This is a personal project designed mainly to track monthly income, expenses, savings and efficiency. Includes:

- React-based frontend using hooks and component-driven architecture
- Interactive dashboard with balance calculations and data visualization (charts)
- Monthly income and expense tracking with categorized transactions
- Clean, responsive UI designed for portfolio use
- REST API integration with a FastAPI backend

\*GitHub repository (*shared upon request*)

- **PUNTUALAPP – ANDROID ATTENDANCE TRACKER**

Android app developed in **Java** to manage employee attendance through real-time geolocation.

- Uses **Google Maps API** to capture and register location at clock-in/out
- Features secure user authent. using **AWS Amplify** and **Cognito**, with email verification.
- Connects to a **PHP-based backend** hosted on **AWS EC2**, interfacing with a **MySQL** database
- Backend includes **phpMyAdmin** for database visualization and management
- Built as a **final degree project** for the (DAM) program, in Barcelona.

- **PEÑA BARCELONISTA I TRONDHEIM – COMMUNITY WEB APP**

A responsive web platform built for FC Barcelona supporters in Trondheim.

- Interactive UI components with React and Tailwind CSS
- User authentication and data management using Supabase
- Accessible, responsive design with real-world features (events, profiles, dark mode)
- Deployed on Vercel with CI/CD

\*More projects have been developed (*shared upon request*).

## Work experience

---

### **AUTRONICA FIRE AND SECURITY AS – TRONDHEIM, NORWAY**

#### **Warehouse Operator — May 2024 – Present**

- Assembled and tested fire alarm sensors; handled national/international shipments.

### **CENCORA - WORLD COURIER – BARCELONA, SPAIN**

#### **OPS Coordinator / Customs Broker — Dec 2021 – Feb 2024**

- Managed international air shipments for pharma and R&D labs.  
- Worked as customs agent and supported warehouse/truck logistics.

*\*(Earlier roles at CMA CGM, Ceva Freight, Vapores Suardiaz, and UPS are available upon request.)*
